

# Sealoflex Fabric

## Reinforcing Fabric for Sealoflex Waterproofing System

### Commercial Product Data Sheet

#### Description

Sealoflex Fabric (Sometimes referred to as "Flashing Fabric") is a polyester, non-woven, stitch-bonded and heat set fabric.

#### Uses

- Roof Panel Joints
- Detail work such as flashings, copings, gutters, etc.
- Interiors of parapet walls
- Flat, smooth roofs
- Conforms readily to uneven surfaces
- Easy to apply
- Comes in a variety of sizes

#### Instructions for Use

When using Sealoflex Fabric, always lay the fabric into a generous coat of Sealoflex Pink or Enviroflex, allowing the wet product to saturate the fabric from below. Another coat of Sealoflex Pink or Enviroflex is then applied to ensure saturation from above.

#### Important Notes

To achieve an aesthetically pleasing finish when applying Sealoflex Fabric, always apply with the "fluffy" side down.

#### Color

White
